

XIV INTERNATIONAL WORKSHOP ON EMANCIPATORY PARADIGMS

**LATIN AMERICA
AND THE CARIBBEAN**

*** 25/27
OCTOBER 2021**

「 ONLINE 」

ANNOUNCEMENT

Friends of our international workshops:

The world capitalist system has submerged the planet since the end of 2019 in a deep crisis, where the health, economic, labor, collapsed, and the life of human beings has been situated in a field of battle, threatened by a virus of high mortality and contagion.

Societies and human beings are experiencing a pandemic that has sharpened the lethal contradictions of capital with respect to life.

The consequences of the perverse mechanism of the total market and privatization plunder of nature, of peoples, of common goods, in pandemic conditions, must be faced from practice and emancipatory critical thinking.

From the experiences of solidarity, collective resistance, from wills political and social in favor of life we call to update, share and think our emancipatory paradigms.

The capitalist pandemic is longer than that of the new coronavirus.

It is urgent to articulate our dreams, sensibilities, wills and actions to form integral strategies of struggle that allow us to build a world without exploitation, oppression or discrimination, in which human beings can coexist harmoniously with nature, in the midst of our diversity; a world with social, environmental and gender justice.

Paradigms workshop have more than two decades of realization and we want to celebrate this shared will of rebellion accumulated in them.

We will meet in the virtual space with a diverse program of activities central and parallel, in a self-managed and decentralized way to share knowledge, looked at in an open and critical way, in the dialogue of knowledge and experiences, in order to enrich the multiple proposals to fight for emancipation.

In these circumstances, still with a high risk of contagion, the «América Latina: Social Philosophy and Axiology» (Galfisa) of the Institute of Philosophy of Cuba, the Dr. Martin Luther King Jr Memorial Center, the Our America Project, The Tizza, the Articulation of Social Movements Towards ALBA

In co-sponsorship with the Cuban political and mass organizations, CTC; ANAP and FMC, share the desire and the will to convene the **XIV International Workshop on Emancipatory Paradigms of Latin America and the Caribbean** (online), to be carried out on October 25, 26 and 27, 2021.

Objectives

- Reflect on accumulated alternatives, struggles and resistances that build emancipatory life paradigms in the face of the crisis of global capitalism.
- Denounce the necropolitics and the exacerbation of capitalist predation in times of pandemic.
- Paying tribute to leaders and referents who in life expanded the possibilities of emancipatory paradigms in Cuba, Latin America and the Caribbean.
- Encourage the exchange of autonomous experiences in Cuba and the region in the goal to widen the anticapitalist cultural corridor.

We will work on various platforms such as Facebook, Telegram channel and WhatsApp, as well as the Zoom and Jitsi Meet platforms, depending on the activities of the program that we will share in the month of September.
